Bulletin Board Service

MSgt Scott Franklin

14 Dec 1998

What it does...

- Classified EW system software is posted for use by AF units and other agencies worldwide

- Features include file library access and classified e-mail to ECSF and other BBS users

Who’s on now…

- After security clearance verification users are assigned to a file library class tailored to their unit

- Currently over 450 users are assigned to 84 file library classes

What we have...

- BBS is a PC running software capable of connecting to 14 users simultaneously
- Two methods of connection--via SIPRNET and via STU-III

Accessing with SIPRNET...

- 6 channels are available for Windows supported connections
- Users require a SIPRNET connection, Windows, and Worldgroup Manager software
- Worldgroup Manager can be downloaded from the ECSF SIPRNET web site Files page (IP address 207.84.138.212)

Accessing with STU III...

- 8 ATT Model 1900 Secure Data Devices are used for STU III connections
- STU III users may use DOS or Windows and a communication program (ie Procomm Plus)
- STU III registration number must be provided to ECSF for entry on access list

Other Issues

- A Commercial Off-the -Shelf Computer may be used to access the BBS--modification instructions are located on the unclassified and SIPRNET ECSF web sites
- SERENE BYTE/PACER WARE Data Messages may soon no longer be provided via AUTODIN

Questions

- Contact MSgt Franklin for specific BBS connection assistance
  - DSN 468-2010, (912)926-2010 Commercial
  - BBS: 468-7283, (912)926-7283 Commercial
